

Two-Pane QA Review Protocol

Inline comments paired with a structured log

Quality assurance runs in two panes at once. One pane holds inline comments on the artifact itself, where an issue lives. The other holds a structured log that scores every issue, assigns an owner, and tracks it to resolution. Comments tell you what; the log tells you whether it shipped. Together they make sure nothing is waved through and nothing is lost between rounds.

SEVERITY

Four levels, each with a rule

LEVEL	DEFINITION	WHEN IT MUST BE RESOLVED
■ S1	Blocks the learner. Broken link, wrong answer key, inaccessible content, factual error.	Before anything else. Never ships.
■ S2	Impairs learning. Confusing instruction, misalignment, missing scaffold.	This review round.
■ S3	Polish. Tone, formatting, a clearer example.	Logged. Fixed if time allows.
■ S4	Note for next time. Structural ideas beyond current scope.	Backlog for the next iteration.

SEQUENCE

How a review runs

1	Reviewer reads the artifact as a learner would, top to bottom, before judging anything.
2	Inline comment at every issue, in the artifact, where it lives.
3	Each comment gets one row in the log: location, issue, severity, owner.
4	Owner resolves, marks the row, and replies in the comment thread.
5	Reviewer verifies each row before closing it. Owners do not close their own rows.

The log is also the record. When scope or quality is later disputed, the evidence already exists, scored and dated, with no reconstruction needed.

SIGN-OFF

What must be true to ship

- Zero open S1 items. No exceptions.
- Every S2 item resolved and verified by the reviewer.
- S3 items either fixed or explicitly deferred with a reason in the log.
- Accessibility checks complete and recorded.
- The reviewer, not the owner, closes the review.

SAMPLE LOG

QA log, mid-round

ID	LOCATION	ISSUE	SEV	OWNER	STATUS
M4-014	Lesson 4.4 key	Answer key marks a correct schema as failing.	S1	build	Verified
M4-015	Lesson 4.2 video	No captions on the walkthrough.	S1	media	Open
M4-016	Intro page	Objective verb does not match the assessment.	S2	design	Resolved
M4-017	Lesson 4.3	Hint reveals the answer too early.	S2	design	Open
M4-018	Rubric	Two criteria overlap; tighten wording.	S3	design	Deferred

Abstracted sample. Client names and proprietary content withheld. Structure and method are representative of production work.
